

MAKE A BUTTERFLY FEEDER

Keep the butterflies fed and the kids entertained with this simple butterfly feeder!

What you will need:

Paper or plastic plate
String
Mushy, over ripe fruit

What to do:

Step 1: Make three holes around the edge of the plate.

Step 2: Thread some string through each hole tying a knot under the plate.

Step 3: Tie the 3 ends of the string together above the plate (it should look like an upsidedown parachute).

Step 4: Smush some fruit onto the plate (bananas are good!)

Step 5: Hang the plate near some flowers and wait for the butterflies to arrive.

Step 6: Keep a note of which butterflies you see and which fruit they liked best.
